Grand Total **\$32,222.20(USD)**

Pricing Metric :

Price is indicative of the following -
 # of Devices - 5

As Motorola does not have an installation division for vehicles, Cleveland PD will pay 911 Custom, \$650 per vehicle, \$1,300 total, to install the two M500s.

Pricing Summary

	Sale Price
Upfront Costs for Hardware, Accessories and Implementation (if applicable)	\$23,623.80
Year 2 Subscription Fee	\$2,149.60
Year 3 Subscription Fee	\$2,149.60
Year 4 Subscription Fee	\$2,149.60
Year 5 Subscription Fee	\$2,149.60
Grand Total System Price (Inclusive of Upfront and Annual Costs)	\$32,222.20

**Upfront costs include the cost of Hardware, Accessories and Implementation, where applicable.*

Notes:

- The Pricing Summary is a breakdown of costs and does not reflect the frequency at which you will be invoiced.
- This quote contains items with approved price exceptions applied against them.
- Unless otherwise noted, this quote excludes sales tax or other applicable taxes (such as Goods and Services Tax, sales tax, Value Added Tax and other taxes of a similar nature). Any tax the customer is subject to will be added to invoices.
- Unless otherwise noted in this quote / order, installation of equipment is not included.

M500 IN-CAR VIDEO SYSTEM SOLUTION DESCRIPTION

The M500 In-Car Video System is the first AI-enabled in-car video solution for law enforcement. It combines Motorola's powerful camera technology with our industry-leading digital evidence management software, VideoManager, to deliver high-quality digital evidence and real-time analytics.

The M500 offers the following benefits:

- Delivers exceptionally clear, evidence-grade video, from inside and outside the vehicle
- The M500 has three high-definition cameras, mounted on the front and rear windshield and in the cabin. The front camera has a 4K sensor, with an ultra high-definition recording resolution that captures both wide-angle and focused video streams. The cabin camera's infrared illumination allows backseat recording in total darkness, and a built-in microphone captures audio in the vehicle during recording.
- Works reliably, even in challenging situations
- The cameras and processor are small, rugged devices, easily and securely installed where they do not hinder any line of sight. They are tamper proof and built to withstand significant impact and severe weather conditions. Even if a vehicle is in a serious collision, the Uninterruptible Power Supply automatically kicks in to continue capturing evidence for those critical extra seconds.
- Protects video data, whether in transit or at rest
- The powerful core processor, with a 1 terabyte drive, securely stores all video footage, encrypting the data to prevent cyber threats.
- Provides users a reliable, easy-to-learn system
- Ease of use is at the heart of the M500. The interface is highly intuitive, and any feature can be accessed with no more than three touches of the control panel. Users can start a recording manually or program sensors to activate a recording when triggered – such as a siren, blue lights, vehicle speed, crash detection, wireless microphones, and more. After the recording starts and is categorized, everything is automated, including the uploading of footage to the system's evidence management software, VideoManager. There, recordings are easily managed, redacted, organized, and shared with all authorized parties, including first responders, fleet managers, investigative officers, supervisors, prosecutors, and legal teams.
- Increases efficiency
- The system's software makes it easy to search and analyze video footage, which can save countless hours for users and minimize human error.
- Promotes trust
- By providing a clear record of incidents that occur while officers are on duty, the M500 promotes trust between public safety agents and the communities they serve.
- Integrates seamlessly with other Motorola technologies
- The M500 offers additional benefits when working in conjunction with Motorola's V700 Body-Worn Camera or L5M License Plate Recognition camera and VehicleManager.
 - When used with the V700, the M500 in-car video system triggers the V700 to record at the same time. Officers can focus on the situation at hand, while the cameras – working together as a seamless system – capture synchronized recording from multiple vantage points. The footage is uploaded to and can be reviewed on the same system.

- When used with the L5M, both the LPR camera and the M500 feed their collected license plate data into Vigilant VehicleManager and display the information on a single interface. Working together, the systems increase coverage while maintaining ease of use through a shared user interface and database.

The M500 is a reliable and comprehensive mobile video solution that will enhance safety, promote accountability, and improve efficiency. It ensures that you always have the critical information needed for smarter, faster decisions to help keep officers and the communities they serve safe.
